Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 2 recites "wherein the capacitor being adapted to balance the voltage of the capacitor supplied by access to energy stored therein to thereby provide voltage to the output," the specification does not disclose that the capacitors are adapted to balance their own voltages and provide an output, instead the specification discloses using a balancing circuit made up of freely oscillating inverters to balance the voltages of the capacitors.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bock (US 4,313,155).

Bock discloses a high input voltage DC to DC power converter with a balancing circuit for voltages of a series connection of capacitors ("Power Circuit" figure 1 ref# 10 and figure 2 ref# 10A-10D, "Power Control" figure 2 ref# 133 and figure 3) having at least two intermediate circuit capacitors connected in series over intermediate circuit voltage ("Capacitor" figure 2 ref# 120-127), the balancing circuit comprises capacitor-specific freely oscillating inverters ("Power Circuit" figure 2 ref# 10A-10D, col. 5 lines 36-68, col. 6 lines 1-31, and col. 8 lines 41-46), the input poles of which are connected in parallel with the capacitor corresponding to the inverter and the output poles of which are connected in parallel to provide a voltage source ("Power Circuit" figure 2 ref# 10A-10D and "Output Voltage" figure 2 ref# 104,106), and the capacitor specific freely oscillating inverters being adapted to balance the voltages of the capacitor supplied by access to energy stored therein to thereby provide voltage to the output ("Power Circuit" figure 2 ref# 10A-10D, "Output Voltage" figure 2 ref# 104,106, col. 5 lines 36-68, col. 6 lines 1-31, and col. 8 lines 41-46).

Response to Arguments

5. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
